DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-6, 9, 10, 12, and 13 are rejected under 35 U.S.C. 102(b) as being anticipated by WO 97/13590.

WO 97/13590 teaches a method as claimed. See entire document, especially Figs. 1-3 and pages 5-10.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to

Art Unit: 1746

consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

5. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

6. Claims 7 and 8 are rejected under 35 U.S.C. 103(a) as being unpatentable over WO 97/13590 in view of Krussel et al (US Patent No 5,723,019).

WO 97/13590 teaches the claimed method except for specifically claimed pressures and water delivery times.

Krussel et al teach (see et least column 5, line 63 – column 6, line 58 and column 4, lines 24-34) that such parameters were conventional in wafer cleaning utilizing the same equipment (DSS-200TM of OnTrak Systems, Inc.) as WO 97/13590.

It would have been obvious to an ordinary artisan at the time the invention was made to employ the conventional for the art operation parameters in the method of WO 97/13590 with reasonable expectation of adequate results.

7. Claim 14 is rejected under 35 U.S.C. 103(a) as being unpatentable over WO 97/13590 in view of Itzkowitz (US Patent NO 5,675,856).

WO 97/13590 teaches the claimed method except for the specifically claimed rotation speed.

However, Itzkowitz teaches that such rotation speed was conventional for wafer cleaning in a double brush box.

It would have been obvious to an ordinary artisan at the time the invention was made to rotate wafers in the method of WO 97/13590 with a speed conventional for such processes with reasonable expectation of success.

Double Patenting

8. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

9. Claims 1-4, 11-13 and 15 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-19 of U.S. Patent No. 6,093,254. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claims of the patent disclosed all the limitations of the instant claim.

Conclusion

10. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. US Patents No 5,693,148, 5,858,109, 5,806,126 and 6,711,775 are cited to show the state of the prior art with respect to the wafer cleaning methods utilizing brushes.
